

Painting Budget & Quote Guide

Paint quantity, prep, coats, trim, protection and labor scope

HOW TO USE THIS GUIDE

Plan first. Price second.

This 12-page field guide is designed to be used beside HomeCostEngine calculators, measurements, product selections and contractor proposals. It does not try to replace a site inspection or local professional. Instead, it helps you make assumptions visible so quotes become easier to understand and compare.

Contents

1. Estimate paintable area
2. Define surface preparation
3. Set primer and coat assumptions
4. Protect the property
5. Price trim, doors and cabinets separately
6. Plan interior and exterior variables
7. Compare painting proposals
8. Project checklist
9. Budget worksheet
10. Next steps

Use this guide for planning and education only. Verify final pricing, code, permits, suitability and scope with qualified local professionals.

PAINTING

Estimate paintable area

Measure walls, ceilings, doors and trim separately and use product coverage as a planning input. The purpose is to turn a broad project assumption into something you can measure, price or confirm in writing. Keep homeowner decisions separate from items that require a site inspection, product specification or local professional review.

Watch for buying paint only from floor area or room count. If a proposal or plan leaves this point unclear, do not bury it inside the total. Record the assumption, ask who is responsible, and decide whether it belongs in fixed scope, an allowance, a unit price or contingency.

Action plan

- Use a room-by-room surface schedule.
- Write the supporting measurement, quote line or product selection next to this decision.
- Update the working budget as soon as the assumption changes.

FIELD NOTE

What is the one assumption on this page that could change your price or contractor scope? Write it down before moving to the next chapter.

PAINTING

Define surface preparation

Specify cleaning, patching, sanding, caulking, scraping and repair level. The purpose is to turn a broad project assumption into something you can measure, price or confirm in writing. Keep homeowner decisions separate from items that require a site inspection, product specification or local professional review.

Watch for the phrase prep as needed with no measurable expectation. If a proposal or plan leaves this point unclear, do not bury it inside the total. Record the assumption, ask who is responsible, and decide whether it belongs in fixed scope, an allowance, a unit price or contingency.

Action plan

- Ask the painter to describe prep by surface.
- Write the supporting measurement, quote line or product selection next to this decision.
- Update the working budget as soon as the assumption changes.

FIELD NOTE

What is the one assumption on this page that could change your price or contractor scope? Write it down before moving to the next chapter.

PAINTING

Set primer and coat assumptions

Write planned primer and finish coats, especially for repairs or major color changes. The purpose is to turn a broad project assumption into something you can measure, price or confirm in writing. Keep homeowner decisions separate from items that require a site inspection, product specification or local professional review.

Watch for assuming one-coat coverage applies to every color and substrate. If a proposal or plan leaves this point unclear, do not bury it inside the total. Record the assumption, ask who is responsible, and decide whether it belongs in fixed scope, an allowance, a unit price or contingency.

Action plan

- Record coat assumptions in every proposal.
- Write the supporting measurement, quote line or product selection next to this decision.
- Update the working budget as soon as the assumption changes.

FIELD NOTE

What is the one assumption on this page that could change your price or contractor scope? Write it down before moving to the next chapter.

PAINTING

Protect the property

Assign floor, furniture, plant, window and adjacent-surface protection responsibilities. The purpose is to turn a broad project assumption into something you can measure, price or confirm in writing. Keep homeowner decisions separate from items that require a site inspection, product specification or local professional review.

Watch for a price that excludes furniture moving or daily protection. If a proposal or plan leaves this point unclear, do not bury it inside the total. Record the assumption, ask who is responsible, and decide whether it belongs in fixed scope, an allowance, a unit price or contingency.

Action plan

- Include protection and cleanup in the scope.
- Write the supporting measurement, quote line or product selection next to this decision.
- Update the working budget as soon as the assumption changes.

FIELD NOTE

What is the one assumption on this page that could change your price or contractor scope? Write it down before moving to the next chapter.

PAINTING

Price trim, doors and cabinets separately

Recognize that detailed surfaces have different labor intensity from broad walls. The purpose is to turn a broad project assumption into something you can measure, price or confirm in writing. Keep homeowner decisions separate from items that require a site inspection, product specification or local professional review.

Watch for a whole-house wall rate that is assumed to include doors and cabinetry. If a proposal or plan leaves this point unclear, do not bury it inside the total. Record the assumption, ask who is responsible, and decide whether it belongs in fixed scope, an allowance, a unit price or contingency.

Action plan

- Count detailed surfaces before comparing bids.
- Write the supporting measurement, quote line or product selection next to this decision.
- Update the working budget as soon as the assumption changes.

FIELD NOTE

What is the one assumption on this page that could change your price or contractor scope? Write it down before moving to the next chapter.

Plan interior and exterior variables

Account for occupancy, weather, access, substrate repair and sequencing with other trades. The purpose is to turn a broad project assumption into something you can measure, price or confirm in writing. Keep homeowner decisions separate from items that require a site inspection, product specification or local professional review.

Watch for exterior schedules that ignore temperature and rain limits. If a proposal or plan leaves this point unclear, do not bury it inside the total. Record the assumption, ask who is responsible, and decide whether it belongs in fixed scope, an allowance, a unit price or contingency.

Action plan

- Document weather and access assumptions.
- Write the supporting measurement, quote line or product selection next to this decision.
- Update the working budget as soon as the assumption changes.

FIELD NOTE

What is the one assumption on this page that could change your price or contractor scope? Write it down before moving to the next chapter.

PAINTING

Compare painting proposals

Match product line, sheen, prep, primer, coats, included surfaces and cleanup. The purpose is to turn a broad project assumption into something you can measure, price or confirm in writing. Keep homeowner decisions separate from items that require a site inspection, product specification or local professional review.

Watch for choosing the lowest total when one quote includes much less preparation. If a proposal or plan leaves this point unclear, do not bury it inside the total. Record the assumption, ask who is responsible, and decide whether it belongs in fixed scope, an allowance, a unit price or contingency.

Action plan

- Normalize proposals by room or elevation.
- Write the supporting measurement, quote line or product selection next to this decision.
- Update the working budget as soon as the assumption changes.

FIELD NOTE

What is the one assumption on this page that could change your price or contractor scope? Write it down before moving to the next chapter.

Project checklist

Resolve or document each item before you approve the final scope or purchase decision.

- Surface area estimate
- Prep level
- Primer and coats
- Product and sheen
- Trim and doors
- Protection and cleanup
- Touchup and care plan

CHECKPOINT

Any unchecked item is not automatically a problem. It is a prompt to clarify responsibility, price or assumptions in writing before money is committed.

WORKING DOCUMENT

Budget worksheet

Keep planned amounts, actual quotes and notes together. Do not hide allowances or contingency inside one total.

Paint and primer	Planned: \$ _____
Prep materials	Planned: \$ _____
Wall labor	Planned: \$ _____
Ceilings	Planned: \$ _____
Trim and doors	Planned: \$ _____
Repairs	Planned: \$ _____
Access or equipment	Planned: \$ _____
Contingency	Planned: \$ _____

Update this worksheet whenever a quote, selection or change order changes the project.

Next steps

You now have a practical framework for painting planning. Move from generic assumptions to real measurements, written product selections and comparable local proposals as your project becomes more defined.

Use HomeCostEngine next

- Run the relevant free calculator at homecostengine.com.
- Compare contractor proposals with matching scope and allowances.
- Keep a separate contingency instead of hiding uncertainty inside fixed costs.
- Save this guide with your quotes, selections and final project records.
